

How to Add Services to a Current DDP Provider Contract

For a qualified provider of DDP services with current contract to be authorized to provide additional services, you must determine which additional services you are able to provide under a particular funding source. See the links under [DDP Medicaid Waiver Information](#) for the specific waiver(s) and applicable [Administrative Rules of Montana](#) (Dept. No. 37, Chapter 34).

Once you determine which additional services you can offer while meeting Department rules, you must fill out the [Current Provider application](#). On this application, you will identify those additional services you interested in providing.

OR For existing DDP qualified providers to add licensed/certified services to a current contract with the Developmental Disabilities Program (DDP), you must use the [application to add a licensed/certified service](#).
