

2011 1st Quarter STD tables (Jan-Mar) — Missing and Unknowns - By county and state

Note: The number of case reports presented should be used for quality improvement only as the STD case report totals for this quarter might differ slightly from official case counts.

COUNTY	Age		Race		Interview completed ('no' or 'pending')		Rx		Pre-test HIV counseling		HIV testing		Internet partners		Sex while high		PID (females)		Pregnant (females)		Total County STD Reports (female)	Total County STD Reports (male and female)	Partner Disposition <sup>s</sup> (‘Insufficient information to begin investigation’ or ‘unable to locate’ or ‘blank’)

\*23 STD cases not shown in table because of missing county data.

\*\*670 partners not shown in table because of missing county data.

<sup>§</sup>Analysis of partner disposition data provides a crude measure for how successful the local public health agency is in contacting and appropriately treating the sexual partners of STD cases. Conducting statewide data linkages between individual STD cases and their sexual partners is not yet possible; therefore, the number of partner dispositions per STD case is used as a proxy for the number of successful partner notifications and treatments per STD case.
