Note: The number of case reports presented should be used for quality improvement only as the STD case report totals for this quarter might differ slightly from official case counts. Y=Yes or N=No must be marked on STD Case Record Report to be counted for completeness. Analysis of partner disposition data provides a crude measure for how successful the local public health agency is in contacting and appropriately treating the sexual partners of STD cases. Conducting statewide data linkages between individual STD cases and their sexual partners is not yet possible; therefore, the number of partner dispositions per STD case is used as a proxy for the number of successful partner notifications and treatments per STD case. Please see STD variable key for descriptions of column headings in this report.

Color Key Cases

80-100% Completed
50-79% Completed
0-49% Completed

Partners

≥1.0 partners per total STD cases
0.8-0.99 partners per total STD cases
<0.8 partners per total STD cases
