# **CLIENT TREATMENT SCREEN**

## **GENERAL PROCEDURES**

The Services and Treatments Screen is completed for each client admitted or readmitted into a treatment program with the intention of documenting the specific services and treatments provided to the client. Services are assigned to each facility and the service records will be used for billing.

Whether you are entering data for a single treatment or a date span of treatment, the information that you will be entering is essentially the same. It consists of the facility identification, date of service or, in the case of date spans, the start and end date for the services being rendered, services performed by, number of units and service code you are billing.

#### SAMS allows for 40 days from the Service Date to enter this information into SAMS.
