BACKGROUND

The 2017 Legislature passed House Bill (HB) 458, requiring the Department of Public Health and Human Services (DPHHS) to monitor Montana Developmental Center (MDC) residents, including residents who have transitioned out of the facility as required under Senate Bill 411 of the 2015 Legislative Session. HB 458 states the Department is to monitor clients who have been discharged from MDC into a community home per Montana Code Annotated (MCA) 53-20-302.

MONITORING

Monitoring is conducted quarterly as per HB 458.

- Quarter one of monitoring was completed for the dates of July 1, 2017, through Sept. 30, 2017.
- Quarter two of monitoring was completed for the dates of Oct. 1, 2017, through Dec. 31, 2017.
- Quarter three of monitoring was for the dates of Jan. 1, 2018, through Mar. 31, 2018.
- Quarter four of monitoring was for the dates of April 1, 2018, through June 30, 2018.
- Quarter five of monitoring was for the dates of July 1, 2018, through Sept. 30, 2018.
- Quarter six of monitoring was for the dates of Oct. 1, 2018, through Dec. 31, 2018.
- Quarter seven of monitoring was for the dates of Jan. 1, 2019, through Mar. 31, 2019.
- Quarter eight of monitoring was for the dates of April 1, 2019, through June 30, 2019.
- Quarter nine of monitoring was for the dates of July 1, 2019, through Sept. 30, 2019.
- Quarter 10 of monitoring was for the dates of Oct. 1, 2019, through Dec. 31, 2019.
- Quarter 11 of monitoring was for the dates of Jan. 1, 2020, through Mar. 31, 2020.
- Quarter 12 of monitoring was for the dates of April 1, 2020, through June 30, 2020.

- Quarter 13 of monitoring was for the dates of July 1, 2020, through Sept. 30, 2020.
- Quarter 14 of monitoring was for the dates of Oct. 1, 2020, through Dec. 31, 2020.
- Quarter 15 of monitoring was for the dates of Jan. 1, 2021, through Mar. 31, 2021.
- Quarter 16 of monitoring was for the dates of April 1, 2021, through June 30, 2021.
- Quarter 17 of monitoring was for the dates of July 1, 2021, through Sept. 30, 2021.
- Quarter 18 of monitoring was for the dates of Oct. 1, 2021, through Dec. 31, 2021.
- Quarter 19 of monitoring was for the dates of Jan. 1, 2022 through Mar. 31, 2022.
- Quarter 20 of monitoring was for the dates of April 1, 2022, through June 30, 2022.
- Quarter 21 of monitoring was for the dates of July 1 through Sept. 30, 2022.
- Quarter 22 of monitoring was for the dates of Oct. 1, 2022, through Dec. 31, 2022.
- Quarter 23 of monitoring was for the dates of Jan. 1, 2023, through Mar. 31, 2023.
- Quarter 24 of monitoring was for the dates of April 1, 2023, through June 30, 2023.
- Quarter 25 of monitoring was for the dates of July 1, 2023, through Sept. 30, 2023.
- Quarter 26 of monitoring was for the dates of Oct. 1, 2023, through Dec. 31, 2023.
- Quarter 27 of monitoring was for the dates of Jan. 1, 2024, through Mar. 31, 2024.
- Quarter 28 of monitoring was for the dates of April 1, 2024, through June 30, 2024.
- Quarter 29 of monitoring was for the dates of July 1, 2024, through Sept. 30, 2024.
- Quarter 30 of monitoring was for the dates of Oct. 1, 2024, through Dec. 31, 2024.
- Quarter 31 of monitoring was for the dates of Jan. 1, 2025, through Mar. 31, 2025.

- Quarter 32 of monitoring was for the dates of April 1, 2025, through June 30, 2025.
- Quarter 33 of monitoring was for the dates of July 1, 2025, through Sept. 30, 2025.
- Quarter 34 of monitoring was for the dates of Oct. 1, 2025, through Dec. 31, 2025.
- Quarter 35 of monitoring was for the dates of Jan. 1, 2026, through Mar. 31, 2026.
- Quarter 36 of monitoring was for the dates of April 1, 2026, through June 30, 2026.

There are two tools being used to evaluate outcome measures:

The *Vineland-II Adaptive Behavior Scales, Second Edition,* was used to ascertain whether an individual had improved, diminished, or remained unchanged regarding verbal or nonverbal communication, activities of daily living, and emotional well-being through Quarter 12.

The *Vineland-3* was implemented starting Quarter 13. The Vineland-3 is the latest revision of a standardized instrument that has been widely used in the assessment of individuals with intellectual disabilities. It has been updated to reflect changes in the nature of everyday life and in conceptions of developmental disabilities, and it can provide a reliable and valid method for obtaining a profile of normative adaptive behavior scores from birth to age 90+. The *Vineland-3* has retained some items without change and contains some revised items and many new items, as well as item scoring changes referred to as “relatively small but nonetheless significant.”

Additionally, all versions of the Vineland Adaptive Behavior Scales measure maladaptive behaviors in terms of internalizing and externalizing behaviors that may be rated as moderate or severe. The Vineland provides clear descriptions of a person’s strengths and weaknesses in everyday life. It can be applied uniformly and is an objective means of quantifying behaviors and adaptive skills. The development of the Vineland-3 was a multi-year process, with three phases: content development, pilot data collection to select items for standardization, and national standardization. Factors for standardization appear similar to those in version 2; the population sample for version 3 was smaller (2,560). Vineland scores can provide a baseline of adaptive functioning, and subsequent administrations of the assessment can monitor progress, or lack thereof, in certain areas in which skills may be acquired and maintained.

Therap General Event Reports and Montana Developmental Center Investigation Data, as investigated by the Department of Justice, have been used to ascertain events of physical aggression and sexually inappropriate behaviors. Therap is the online documentation, reporting, and communication software tool for providers working with individuals with developmental disabilities. Providers report incidents, including physical aggression and sexually inappropriate behaviors, through the Therap General Event Reporting system. Since Feb. 2024, incidents involving 0208 waiver recipients in the community have been documented in the incident management module of MedCompass, the Department's electronic care management system.

RESULTS/DATA OF INDIVIDUALS PLACED IN A COMMUNITY HOME AS DEFINED BY 53-20-302, MCA

- Quarters one and two consist of data for 29 individuals;
- Quarter three consists of data for 31 individuals;
- Quarters four, five, six, and seven consist of data for 34 individuals;
- Quarter eight consists of data for 35 individuals;
- Quarter nine consists of data for eight individuals. A significant number of individuals completed eight quarters, or two years, of monitoring as of the end of the previous quarter. Data is not gathered for individuals after being placed in a community home for two years in accordance with HB458.
- Quarter 10 reflects data for nine individuals, which is an increase from the previous quarter due to one person transitioning from the Intensive Behavior Center (IBC) to the community.
- Quarter 11 reflects data for eight individuals. In quarter 10, one member was incorrectly included in the reporting; he has since been removed from the report. It was also discovered that one individual's Vineland scores were incorrectly reported. This has been corrected as well. The scores for communication, daily living, and emotional well-being are the average scores for all the individuals placed in a community home. The data for physical aggression and sexually inappropriate behavior are the total number of incidents from the time, as explained earlier.
- Quarter 12 reflects data for six individuals, as two individuals completed eight quarters, or two years, of monitoring as of the end of the previous quarter. Data is not gathered after two years in accordance with HB458.

- Quarter 13 reflects data for one individual, as five individuals completed eight quarters, or two years, of monitoring as of the end of the previous quarter. Data is not gathered after two years in accordance with HB458.
- Quarter 14 reflects data for one individual.
- Quarter 15 reflects data for one individual.
- Quarter 16 reflects data for one individual.
- Quarter 17 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16.
- Quarter 18 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16.
- Quarter 19 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.
- Quarter 20 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.
- Quarter 21 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.
- Quarter 22 shows no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16.
- Quarter 23 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.
- Quarter 24 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.
- Quarter 25 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.
- Quarter 26 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.
- Quarter 27 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

- Quarter 28 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.
- Quarter 29 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.
- Quarter 30 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.
- Quarter 31 reflects data for one individual as a former MDC resident transitioned from IBC to the community during the reporting period.
- Quarter 32 reflects data for one individual who transitioned from IBC as a former MDC resident during Quarter 31.
- Quarter 32 reflects data for one individual who transitioned from IBC as a former MDC resident during Quarter 31.
- Quarter 33 reflects data for one individual who transitioned from IBC as a former MDC resident during Quarter 31.
- Quarter 34 reflects data for one individual who transitioned from IBC as a former MDC resident during Quarter 31.
- Quarter 35 reflects data for one individual who transitioned from IBC as a former MDC resident during Quarter 31.
- Quarter 36 reflects data for one individual who transitioned from IBC as a former MDC resident during Quarter 31.

The results, presented in bar graph format, followed by a narrative summary, are as follows:

COMMUNICATION, DAILY LIVING, AND EMOTIONAL WELL-BEING OF FORMER MDC RESIDENTS NOW RESIDING IN THE COMMUNITY

INFORMATION FOR QUARTERS ONE AND TWO

From the information gathered, there was a 2.897-point improvement in communication, a 2.31-point improvement in the daily living score, and no change in emotional well-being.

INFORMATION FOR QUARTERS TWO AND THREE

From the information gathered, there was a .629-point decrease in communication, a .753-point improvement in daily living, and a .154-point improvement in emotional well-being.

INFORMATION FOR QUARTERS THREE AND FOUR

From the information gathered, there was a 2.860-point decrease in communication, a 2.372-point decrease in daily living, and a 4.71-point decrease in emotional well-being.

INFORMATION FOR QUARTERS FOUR AND FIVE

From the information gathered, there was a 2.426-point increase in communication, a 1.262-point increase in daily living, and a .202-point increase in emotional well-being.

INFORMATION FOR QUARTERS FIVE AND SIX

From the information gathered, there was a .147-point increase in communication, a .12-point decrease in daily living, and a .323-point decrease in emotional well-being.

INFORMATION FOR QUARTERS SIX AND SEVEN

From the information gathered, there was a .736-point decrease in communication, a .353-point decrease in daily living, and a .735-point increase in emotional well-being.

INFORMATION FOR QUARTERS SEVEN AND EIGHT

From the information gathered, there was a .563-point decrease in communication, a .71-point decrease in daily living, and a 1.176-point decrease in emotional well-being.

INFORMATION FOR QUARTERS EIGHT AND NINE

From the information gathered, there were decreases of 12.792 points in communication, 10.767 points in daily living, and 11.125 points in emotional well-being.

INFORMATION FOR QUARTERS NINE AND 10

From the information gathered, there was a decrease of 1.53 points in communication, 2.045 points in daily living, and 3.105 points in emotional well-being.

INFORMATION FOR QUARTERS 10 AND 11

From the information gathered, there was an increase of 3.155 points in communication, 6.295 points in daily living, and 2.23 points in emotional well-being. Two factors contributing to the significant difference compared to the previous quarter are the removal of an individual from Quarter 11 who was reported on in Quarter 10, and the discovery that one individual had incorrect scores reported for multiple quarters.

INFORMATION FOR QUARTERS 11 AND 12

From the information gathered, there was a decrease of 1.875 points in communication, 8.125 points in daily living, and 7.4 points in emotional well-being. One factor contributing to the significant difference between quarters 11 and 12 was that two individuals had completed eight quarters, or two years, of monitoring as of the end of the previous quarter. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 12 AND 13

From the information gathered, there was a decrease of 13.5 points in communication, a decrease of 20.5 points in daily living, and a decrease of 10.6 points in emotional well-being. One factor contributing to the significant difference between quarters 12 and 13 was that five individuals had completed eight quarters, or two years, of monitoring as of the end of the previous quarter. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 13 AND 14

From the information gathered, there was a decrease of one point in communication, a decrease of one point in daily living, and a decrease of one point in emotional well-being.

INFORMATION FOR QUARTERS 14 AND 15

From the information gathered, all three categories did not see any change.

INFORMATION FOR QUARTERS 15 AND 16

From the information gathered, all three categories did not see any change.

INFORMATION FOR QUARTERS 16 AND 17

Quarter 17 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 17 AND 18

Quarter 18 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 18 AND 19

Quarter 19 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 19 AND 20

Quarter 20 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 20 AND 21

Quarter 21 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 21 AND 22

Quarter 22 shows no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 22 AND 23

Quarter 23 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 23 AND 24

Quarter 24 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 24 AND 25

Quarter 25 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 25 AND 26

Quarter 26 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 26 AND 27

Quarter 27 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 27 AND 28

Quarter 28 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 28 AND 29

Quarter 29 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 29 AND 30

Quarter 30 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 30 AND 31

Quarter 31 reflects the addition of new data for one person. This is the first time since Quarter 16, as that is when the last individual completed eight quarters, or two years, of monitoring. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 31 AND 32

Quarter 32 reflects data for one person who transitioned from IBC as a former MDC resident during Quarter 31. This is the second quarter of data for this individual. The individual is still considered to be in a transitional phase, and staff assisting with assessment are continuing to get to know the person, which may account for assessment result variances. Communication was assessed at 38 points compared to 62 points from the previous quarter, Daily Living Skills rose to 28 points from 20 points,

and Emotional Well Being rose to 40 points from 20 in the previous quarter. The individual had one incident of physical aggression and zero incidents of inappropriate sexual behavior reported during quarter 32.

INFORMATION FOR QUARTERS 32 AND 33

Quarter 33 reflects data for one person who transitioned from IBC as a former MDC resident during Quarter 31. During this reporting period, communication was assessed at 20, a decrease from 38 points; current daily living skills score is 20 compared with 28 in the previous period, and Emotional Well Being decreased from 40 points to the current reporting period score of 20 points.

INFORMATION FOR QUARTER 33 AND 34

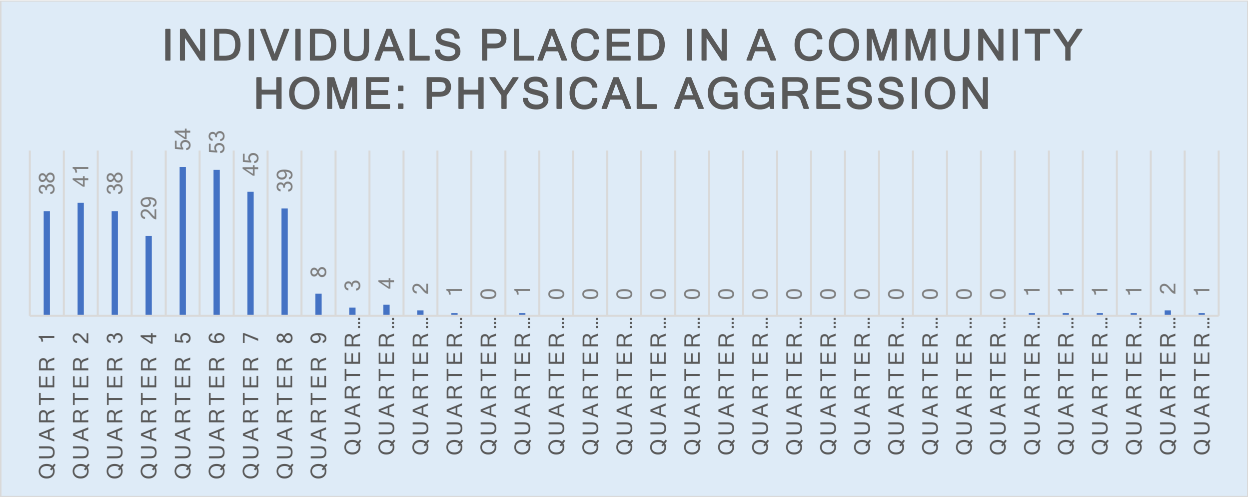
Quarter 34 reflects data for one person who transitioned from IBC as a former MDC resident during Quarter 31. During this reporting period, communication was assessed at 20, current daily living skills score is 20, and Emotional Well Being is also a score of 20 points. The results in all three areas are the same as the previous quarter's report.

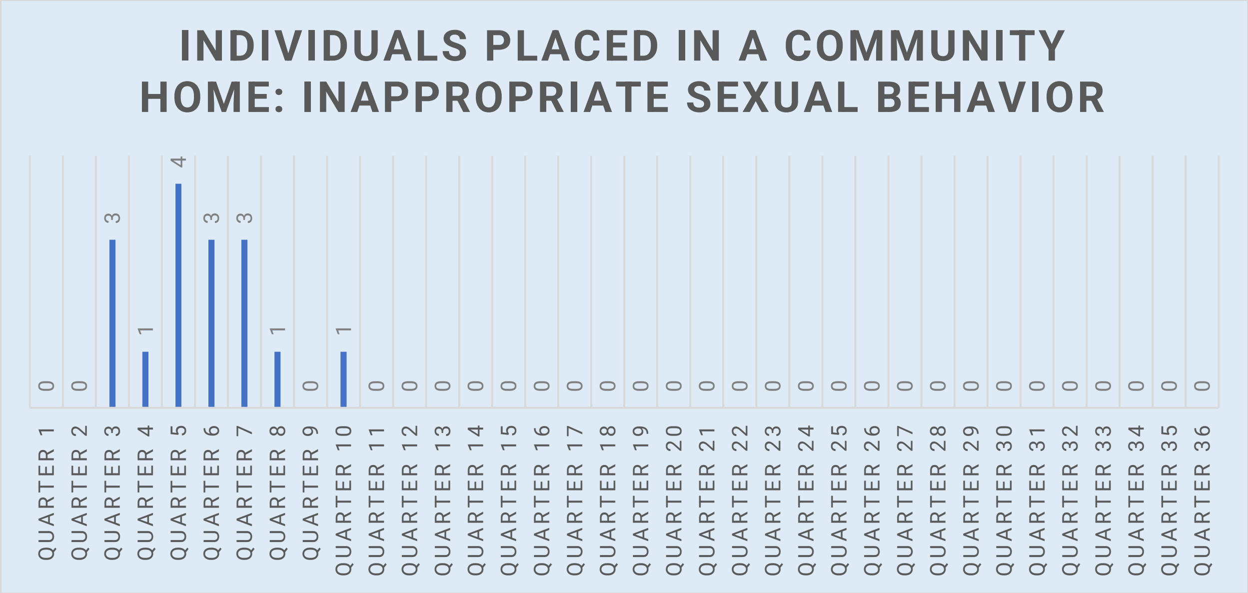
INFORMATION FOR QUARTERS 34 AND 35

Quarter 35 reflects data for one person who transitioned from IBC as a former MDC resident during Quarter 31. During this reporting period, communication was assessed at 20, current daily living skills score is 20, and Emotional Well Being is also a score of 20 points. The results in all three areas are the same as the previous quarter's report.

INFORMATION FOR QUARTERS 35 AND 36

Quarter 36 reflects data for one person who transitioned from IBC as a former MDC resident during Quarter 31. During this reporting period, communication was assessed at 20, current daily living skills score is 20, and Emotional Well Being is also a score of 20 points. The results in all three areas are the same as the previous quarter's report.





PHYSICAL AGGRESSION AND INAPPROPRIATE SEXUAL BEHAVIOR

INFORMATION FOR QUARTERS ONE AND TWO

From the information gathered, there were three more incidents of physical aggression in the second quarter and no change in incidents of zero regarding inappropriate sexual behavior.

INFORMATION FOR QUARTERS TWO AND THREE

From the information gathered, there were two fewer incidents of physical aggression in the third quarter and three more incidents of inappropriate sexual behavior.

INFORMATION FOR QUARTERS THREE AND FOUR

From the information gathered, there were eight fewer incidents of physical aggression in the fourth quarter and two fewer incidents of inappropriate sexual behavior.

INFORMATION FOR QUARTERS FOUR AND FIVE

From the information gathered, there were 25 more incidents of physical aggression in the fifth quarter and three more incidents of inappropriate sexual behavior.

INFORMATION FOR QUARTERS FIVE AND SIX

From the information gathered, there was one less incident of physical aggression in the sixth quarter and one less incident of inappropriate sexual behavior.

INFORMATION FOR QUARTERS SIX AND SEVEN

From the information gathered, there were eight fewer incidents of physical aggression in the seventh quarter and the same number of incidents of inappropriate sexual behavior.

INFORMATION FOR QUARTERS SEVEN AND EIGHT

From the information gathered, there were four fewer incidents of physical aggression in the eighth quarter and two fewer incidents of inappropriate sexual behavior.

INFORMATION FOR QUARTERS EIGHT AND NINE

From the information gathered, there were 31 fewer incidents of physical aggression in the ninth quarter and one less incident of inappropriate sexual behavior.

INFORMATION FOR QUARTERS NINE AND 10

From the information gathered, there were five fewer incidents of physical aggression in the 10th quarter and one more incident of inappropriate sexual behavior.

INFORMATION FOR QUARTERS 10 AND 11

According to the information gathered, documented incidents of physical aggression increased by one in the 11th quarter, and there were zero incidents of inappropriate sexual behavior reported, which is a decrease of one.

INFORMATION FOR QUARTERS 11 AND 12

From the information gathered, there were two fewer documented incidents of physical aggression, and incidents of inappropriate sexual behavior remained at zero in the 12th quarter.

INFORMATION FOR QUARTERS 12 AND 13

From the information gathered, there was one less documented incident of physical aggression, and incidents of inappropriate sexual behavior remained at zero in the 13th quarter.

INFORMATION FOR QUARTERS 13 AND 14

From the information gathered, there was one less documented incident of physical aggression, and incidents of inappropriate sexual behavior remained at zero in the 14th quarter.

INFORMATION FOR QUARTERS 14 AND 15

From the information gathered, there was an increase of one documented incident of physical aggression, and incidents of inappropriate sexual behavior remained at zero in the 15th quarter.

INFORMATION FOR QUARTERS 15 AND 16

From the information gathered, documented incidents of physical aggression remained the same at one, and incidents of inappropriate sexual behavior remained at zero in the 16th quarter.

INFORMATION FOR QUARTERS 16 AND 17

Quarter 17 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 17 AND 18

Quarter 18 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 18 AND 19

Quarter 19 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 19 AND 20

Quarter 20 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 20 AND 21

Quarter 21 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 21 AND 22

Quarter 22 shows no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 22 AND 23

Quarter 23 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 23 AND 24

Quarter 24 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 24 AND 25

Quarter 25 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 25 AND 26

Quarter 26 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 26 AND 27

Quarter 27 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 27 AND 28

Quarter 28 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 28 AND 29

Quarter 29 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 29 AND 30

Quarter 30 reflects no new data as the last individual completed eight quarters, or two years, of monitoring as of the end of Quarter 16. Data is not gathered after two years in accordance with HB458.

INFORMATION FOR QUARTERS 30 AND 31

One former MDC resident transitioned to the community from IBC during the reporting period. While at MDC during the reporting period, he had two incidents of physical aggression, and one incident of physical aggression reported since transitioning to the community. There were zero incidents of inappropriate sexual behavior reported.

INFORMATION FOR QUARTERS 31 AND 32

One incident of physical aggression was reported, and zero incidents of inappropriate sexual behavior were reported.

INFORMATION FOR QUARTERS 32 AND 33

One incident of physical aggression was reported in Quarter 33. There were zero incidents of inappropriate sexual behavior reported.

INFORMATION FOR QUARTERS 33 AND 34

There was one incident of physical aggression reported in Quarter 34. There were zero incidents of inappropriate sexual behavior reported. This is similar to Quarter 33.

INFORMATION FOR QUARTERS 34 AND 35

There were two incidents of physical aggression reported in Quarter 35. With an additional incident where the individual was the victim. There were zero incidents of inappropriate sexual behavior reported. This has been a slight increase since the previous quarter.

INFORMATION FOR QUARTERS 35 AND 36

There was one incident of physical aggression reported in Quarter 36. With an additional incident where the individual was the victim. There were zero incidents of inappropriate sexual behavior reported. There has been a slight decrease in physical aggression since the previous quarter.

RESULTS/DATA OF INDIVIDUALS RESIDING AT THE MDC

- For the first quarter in which data was collected, there was a total of 19 individuals for whom data was collected.
- The second quarter comprised a total of 18 individuals, for whom data was collected.
- The third quarter comprised a total of 16 individuals.
- The fourth quarter consisted of 10 individuals.
- The fifth quarter comprised a total of nine individuals.
- The sixth quarter comprised a total of nine individuals.
- The seventh quarter comprised a total of nine individuals.
- The eighth quarter comprised a total of eight individuals.
- The ninth quarter comprised a total of eight individuals.
- Data for quarter 10 is for seven individuals, as one individual transitioned to a community-based provider.
- Data for Quarter 11 is for seven individuals.
- Data for quarter 12 is for seven individuals.
- Data collected for quarter 13 is for seven individuals.
- Data collected for quarter 14 is for seven individuals.
- Data collected for quarter 15 is for seven individuals.
- Data collected for quarter 16 is for six individuals.
- Data collected for quarter 17 is for six individuals.
- Data collected for quarter 18 is for six individuals.
- Data collected for quarter 19 is for six individuals.
- Data collected for quarter 20 is for six individuals.
- Data collected for quarter 21 is for six individuals.
- Data collected for quarter 22 is for five individuals.
- Data collected for quarter 23 is for five individuals.

- Data collected for quarter 24 is for five individuals.
- Data collected for quarter 25 is for five individuals.
- Data collected for quarter 26 is for five individuals.
- Data collected for quarter 27 is for five individuals.
- Data collected for quarter 28 is for five individuals.
- Data collected for quarter 29 is for five individuals.
- Data collected for quarter 30 is for five individuals.
- Data collected for Quarter 31 is for five individuals.
- Data collected for Quarter 32 is for four individuals.
- Data collected for Quarter 33 is for four individuals.
- Data collected for Quarter 34 is for four individuals.
- Data collected for Quarter 35 is for four individuals.
- Data collected for Quarter 36 is for four individuals.

The scores for communication, daily living, and emotional well-being are the average scores for all the individuals who were under an MDC commitment or were at the MDC under a voluntary status awaiting community placement.

COMMUNICATION, DAILY LIVING, EMOTIONAL WELL-BEING

INFORMATION FOR QUARTERS ONE AND TWO

From the information gathered, there was a 7.66-point improvement in communication, a 0.66-point increase in daily living, and an improvement of 10.286 points in emotional well-being.

INFORMATION FOR QUARTERS TWO AND THREE

From the information gathered, there was a 4.473-point decrease in communication, a 3.488-point decrease in daily living, and a .503 decrease in emotional well-being.

INFORMATION FOR QUARTERS THREE AND FOUR

From the information gathered, there was a 2.087-point decrease in communication, a 3.462-point decrease in daily living, and a 1.037-point decrease in emotional well-being.

INFORMATION FOR QUARTERS FOUR AND FIVE

From the information gathered, there was a 5.989-point decrease in communication, a 4.789-point decrease in daily living, and a 5.456-point decrease in emotional well-being.

INFORMATION FOR QUARTERS FIVE AND SIX

From the information gathered, there was a 1.667-point decrease in communication, a .111-point increase in daily living skills, and a 1.222-point decrease in emotional well-being.

INFORMATION FOR QUARTERS SIX AND SEVEN

Based on the information gathered, none of the three categories showed any change.

INFORMATION FOR QUARTERS SEVEN AND EIGHT

From the information gathered, there was a 3.056-point increase in communication, a 3.778-point increase in daily living skills, and a 3.653-point increase in emotional well-being.

INFORMATION FOR QUARTERS EIGHT AND NINE

According to the information gathered, there was a 0.5-point decrease in communication, no change in daily living skills, and a 2.125-point decrease in emotional well-being.

INFORMATION FOR QUARTERS NINE AND 10

From the information gathered the was a 0.428-point increase in communication, a three-point increase in daily living skills, and a 3.107-point increase in emotional well-being.

INFORMATION FOR QUARTERS 10 AND 11

From the information gathered, there was a 3.429-point increase in communication, a one-point increase in daily living skills, and a 1.283-point increase in emotional well-being.

INFORMATION FOR QUARTERS 11 AND 12

From the information gathered, the communication score remained the same, there was a one-point decrease in daily living skills, and emotional well-being remained the same.

INFORMATION FOR QUARTERS 12 AND 13

From the information gathered, the communication score increased by 3.72 points, there was a .29-point decrease in daily living skills, and there was an 8.29-point increase in emotional well-being.

INFORMATION FOR QUARTERS 13 AND 14

From the information gathered, the communication score decreased by 1.86 points, there was a 19.86-point decrease in daily living skills, and there was a 13.72-point decrease in emotional well-being. Two factors contributing to the significant difference from quarter 13 to quarter 14 are a change in test administrator and a change from the Vineland II to the Vineland-3, which, as noted, has retained some items without change and contains some revised items, yet many new items, as well as item scoring changes referred to as “relatively small but nonetheless significant.”

INFORMATION FOR QUARTERS 14 AND 15

From the information gathered, the communication score decreased by 2.86 points, there was a three-point increase in daily living skills, and there was a 4.29-point increase in emotional well-being.

INFORMATION FOR QUARTERS 15 AND 16

From the information gathered, the communication score decreased by 1.85 points, there was a 1.15-point increase in daily living skills, and there was a 1.5-point decrease in emotional well-being.

INFORMATION FOR QUARTERS 16 AND 17

From the information gathered, the communication score increased by 1.33 points, there was a 2.84-point decrease in daily living skills, and there was a 14-point decrease in emotional well-being.

INFORMATION FOR QUARTERS 17 AND 18

From the information gathered, the communication score increased by 2.67 points, there was a 4.5-point decrease in daily living skills, and there was a 5.84-point decrease in emotional well-being for quarter 18.

INFORMATION FOR QUARTERS 18 AND 19

Based on the information gathered, the communication score decreased by 7.34 points, daily living skills decreased by three points, and emotional well-being decreased by 7.83 points for quarter 19.

INFORMATION FOR QUARTERS 19 AND 20

From the information gathered, the communication score increased by 4.67 points, there was a 10-point increase in daily living skills, and there was a 34-point increase in emotional well-being for quarter 20.

INFORMATION FOR QUARTERS 20 AND 21

Based on the information gathered, the communication score decreased by 1.67 points, daily living skills decreased by 13.33 points, and emotional well-being decreased by 27.33 points for quarter 21.

INFORMATION FOR QUARTERS 21 AND 22

From the information gathered, the communication score decreased by 10.73 points, there was a 2.07-point increase in daily living skills, and a 3.37-point increase in emotional well-being for quarter 22.

INFORMATION FOR QUARTERS 22 AND 23

From the information gathered, the communication score decreased by 2.8 points, there was a four-point decrease in daily living skills, and an 8.4-point decrease in emotional well-being for quarter 23.

INFORMATION FOR QUARTERS 23 AND 24

Based on the information gathered, the communication score increased by 10.4 points, daily living skills by 5.2 points, and emotional well-being by 13.6 points for quarter 24.

INFORMATION FOR QUARTERS 24 AND 25

From the information gathered, the communication score decreased by 3.2 points; there was a 4.4-point decrease in daily living skills, and emotional well-being remained the same at 40.4 for quarter 25.

INFORMATION FOR QUARTERS 25 AND 26

From the information gathered, the communication score decreased by four points, there was a 1.2 point increase in daily living skills, and emotional well-being decreased by 5.4 points for quarter 26.

INFORMATION FOR QUARTERS 26 AND 27

From the information gathered, the communication score increased by 1.2 points, there was a 5.8-point increase in daily living skills, and emotional well-being increased by 4.8 points for quarter 27.

INFORMATION FOR QUARTERS 27 AND 28

From the information gathered, the communication score decreased by 1.2 points, there was a 5.8-point decrease in daily living skills, and emotional well-being decreased by 7.2 points for quarter 28.

INFORMATION FOR QUARTERS 28 AND 29

From the information gathered, the communication score increased by 2.4 points, there was a four-point increase in daily living skills, and emotional well-being increased by 3.6 points for quarter 29.

INFORMATION FOR QUARTERS 29 AND 30

From the information gathered, the communication score decreased by 10.73 points, there was a 2.07-point increase in daily living skills, and emotional well-being increased by 3.7 points for quarter 30.

INFORMATION FOR QUARTERS 30 AND 31

One former MDC resident transitioned from IBC to the community during the reporting period. From the information gathered on the remaining four individuals, the

communication score increased by 8.9 points, there was a two-point increase in daily living skills, and emotional well-being decreased by 0.15 points for quarter 31.

INFORMATION FOR QUARTERS 31 AND 32

From the information gathered on the four remaining individuals at IBC, the communication score increased by an average of two points, the daily living score increased by 2.5 points, and the emotional well-being score rose by an average of 9.0 points.

INFORMATION FOR QUARTERS 32 AND 33

From the information gathered on the four remaining individuals at IBC, the communication score decreased by an average of 2.5 points, the daily living score increased by one point, and the emotional well-being score decreased by an average of 2.25 points.

INFORMATION FOR QUARTERS 33 AND 34

From information gathered on the four remaining individuals at IBC, the communication score decreased by an average of 3.5 points, the daily living score decreased by an average of 2.25 points, and the socialization domain increased by 0.75 points.

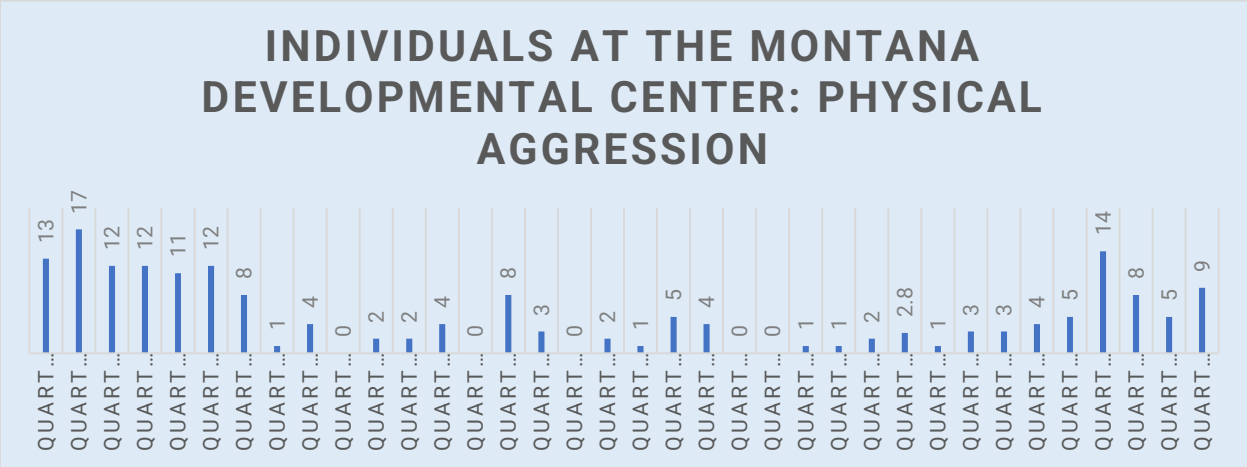
INFORMATION FOR QUARTERS 34 AND 35

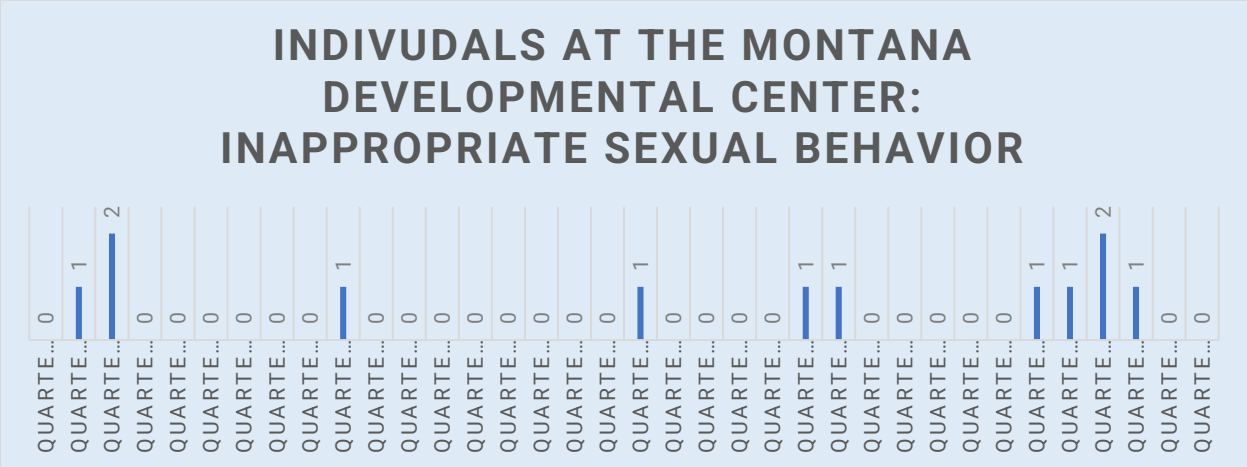
From information gathered on the four remaining individuals at IBC, the communication score remained the same, the daily living score increased by an average of 1.5 points, and the socialization domain decreased by 5.25 points.

INFORMATION FOR QUARTERS 35 AND 36

Based on information gathered on the four remaining individuals at IBC, the communication score increased from the previous month (average of 3 points), the daily living score decreased by an average of 8 points, and the socialization domain decreased by 3.75 points.

The data for physical aggression and sexually inappropriate behavior are the total number of incidents from the time as explained earlier. The results, presented in bar graph format, followed by narrative summary, are:





PHYSICAL AGGRESSION AND INAPPROPRIATE SEXUAL BEHAVIOR

INFORMATION FOR QUARTERS ONE AND TWO

From the information gathered there were four more incidents of physical aggression in the second quarter and one more incident of sexually inappropriate behavior.

INFORMATION FOR QUARTERS TWO AND THREE

From the information gathered, there were five fewer incidents of physical aggression in the third quarter and one more incident of sexually inappropriate behavior.

INFORMATION FOR QUARTERS THREE AND FOUR

From the information gathered, there were the same number of incidents of physical aggression (12), and two fewer incidents of sexually inappropriate behavior.

INFORMATION FOR QUARTERS FOUR AND FIVE

From the information gathered, there was one less incident of physical aggression and the same number of incidents of sexually inappropriate behavior. (0).

INFORMATION FOR QUARTERS FIVE AND SIX

From the information gathered, there was one more incident of physical aggression and the same number of incidents of sexually inappropriate behavior. (0)

INFORMATION FOR QUARTERS SIX AND SEVEN

From the information gathered, there were four fewer incidents of physical aggression and the same number of incidents of sexually inappropriate behavior. (0)

INFORMATION FOR QUARTERS SEVEN AND EIGHT

From the information gathered, there were seven fewer incidents of physical aggression and the same number of incidents of sexually inappropriate behavior. (0)

INFORMATION FOR QUARTERS EIGHT AND NINE

From the information gathered, there were three more incidents of physical aggression, and for the sixth consecutive quarter, there were zero incidents of sexually inappropriate behavior.

INFORMATION FOR QUARTERS NINE AND 10

From the information gathered, there was a decrease of four incidents of physical aggression and an increase of one incident of sexually inappropriate behavior.

INFORMATION FOR QUARTERS 10 AND 11

From the information gathered, there was an increase of one in reported incidents of physical aggression, and zero reported incidents of sexually inappropriate behavior, which is a decrease of 1.

INFORMATION FOR QUARTERS 11 AND 12

From the information gathered, reported incidents of physical aggression remained the same at two, and incidents of sexually inappropriate behaviors remained the same at zero.

INFORMATION FOR QUARTERS 12 AND 13

From the information gathered, reported incidents of physical aggression increased by four, and incidents of sexually inappropriate behaviors remained the same at zero.

INFORMATION FOR QUARTERS 13 AND 14

From the information gathered, reported incidents of physical aggression decreased by four, and incidents of sexually inappropriate behaviors remained the same at zero for quarter 14.

INFORMATION FOR QUARTERS 14 AND 15

From the information gathered, reported incidents of physical aggression increased by eight, and incidents of sexually inappropriate behaviors remained the same at zero for quarter 15.

INFORMATION FOR QUARTERS 15 AND 16

From the information gathered, reported incidents of physical aggression decreased by five, and incidents of sexually inappropriate behaviors remained the same at zero for quarter 16.

INFORMATION FOR QUARTERS 16 AND 17

From the information gathered, reported incidents of physical aggression decreased by three, and incidents of sexually inappropriate behaviors remained the same at zero for quarter 17.

INFORMATION FOR QUARTERS 17 AND 18

From the information gathered, reported incidents of physical aggression increased by two, and incidents of sexually inappropriate behaviors remained the same at zero for quarter 18.

INFORMATION FOR QUARTERS 18 AND 19

From the information gathered, reported incidents of physical aggression decreased by one, and incidents of sexually inappropriate behaviors increased by one for quarter 19.

INFORMATION FOR QUARTERS 19 AND 20

From the information gathered, reported incidents of physical aggression increased by four, and incidents of sexually inappropriate behaviors decreased by one for quarter 20.

INFORMATION FOR QUARTERS 20 AND 21

From the information gathered, reported incidents of physical aggression decreased by one, and incidents of sexually inappropriate behaviors remained the same at zero.

INFORMATION FOR QUARTERS 21 AND 22

From the information gathered, reported incidents of physical aggression decreased by four, and incidents of sexually inappropriate behaviors remained the same at zero.

INFORMATION FOR QUARTERS 22 AND 23

From the information gathered, reported incidents of physical aggression remained the same at zero, and incidents of sexually inappropriate behaviors remained the same at zero.

INFORMATION FOR QUARTERS 23 AND 24

From the information gathered, reported incidents of physical aggression increased by one, and incidents of sexually inappropriate behaviors increased by one.

INFORMATION FOR QUARTERS 24 AND 25

From the information gathered, reported incidents of physical remained the same at one, and incidents of sexually inappropriate behaviors remained the same at one.

INFORMATION FOR QUARTERS 25 AND 26

From the information gathered, reported incidents of physical aggression increased by one, and incidents of sexually inappropriate behaviors decreased by one to zero.

INFORMATION FOR QUARTERS 26 AND 27

From the information gathered, reported incidents of physical aggression increased .8, and incidents of sexually inappropriate behaviors remained at zero.

INFORMATION FOR QUARTERS 27 AND 28

From the information gathered, reported incidents of physical aggression decreased by 1.8, and incidents of sexually inappropriate behaviors remained at zero.

INFORMATION FOR QUARTERS 28 AND 29

From the information gathered, reported incidents of physical aggression increased by two, and incidents of sexually inappropriate behaviors remained at zero.

INFORMATION FOR QUARTERS 29 AND 30

From the information gathered, reported incidents of physical aggression remained at three total, and incidents of sexually inappropriate behaviors remained at zero.

INFORMATION FOR QUARTERS 30 AND 31

One former MDC resident transitioned from IBC to the community during the reporting period. From the information gathered on the remaining four individuals, there were two reported incidents of physical aggression, and incidents of sexually inappropriate behaviors increased to one.

INFORMATION FOR QUARTERS 31 AND 32

For the four remaining individuals at IBC, there were five reported incidents of physical aggression and one incident of sexually inappropriate behaviors, which is the same number as the previous quarter.

INFORMATION FOR QUARTERS 32 AND 33

For the four remaining individuals at IBC who are former MDC residents, three were involved as aggressors of 14 substantiated incidents of physical abuse, and there were two substantiated incidents of sexual abuse involving one person. This is an increase of nine incidents of physical abuse and an increase of one incident of sexual abuse.

INFORMATION FOR QUARTERS 33 AND 34

For the four remaining individuals at IBC who are former MDC residents, three were involved as aggressors of eight substantiated incidents of physical abuse, and there was one incident of substantiated sexual abuse by one member. This is a decrease of six incidents of physical abuse by residents since last quarter and a decrease of one incident of sexual abuse by a resident since last quarter.

INFORMATION FOR QUARTERS 34 AND 35

For the four remaining individuals at IBC who are former MDC residents, three were involved as aggressors of five substantiated incidents of physical abuse, and there were no incidents of substantiated sexual abuse by members. This is a decrease of three

incidents of physical abuse by residents since last quarter and a decrease of one incident of sexual abuse by a resident since last quarter.

INFORMATION FOR QUARTERS 35 AND 36

For the four remaining individuals at IBC who are former MDC residents, two were involved as aggressors of nine substantiated incidents of physical abuse, and there were no incidents of substantiated sexual abuse by members. This is an increase of four incidents of physical abuse by residents since last quarter. Incidents of sexual abuse remained the same.
