

## Theory of Action

SiMR: Improve positive social emotional skills including positive relationships

**Improvement Strategy 1: Comprehensive System of Professional Development:**

*If We...* develop and implement the CSPD

*Then...* we have learning modules available on the ECP learning platform

*So that...* FSSs will access the learning modules to acquire Primary and Comprehensive Certification which will lead to highly qualified Family Support Specialist.

**Improvement Strategy 2: Establish Montana's Part C Pyramid Model Framework**

*If We...* establish a Part C Model Pyramid Model Framework

*Then...* FSSs will acquire knowledge and skills and will implement Pyramid Model practices in homes with families

*So that...* families will have increased capacity to support their child with social and emotional development.

## Montana Milestones Part C Early Intervention Program- Theory of Action

Improvement Strategy 3: Continued refinement of the data management system

*If We...* If we continue to develop the data management system, Med Compass

*Then...* data will be collected and available to FSSs

*So that...* data evaluation and data will be used to inform IFSP development leading to improved child and family outcomes.
