The Impact of COVID-19 on the Health of Montanans

Carmen Byker Shanks PhD RDN, Michelle Grocke PhD, Justin D Shanks PhD, Eliza Weber MPH, Kimberley Scanlon BS

Since COVID-19 Began... Summary of Survey Results

- > Food insecurity substantially increased. Policy and programmatic support should be leveraged to promote food security.
- > Food availability declined, especially in more remote communities. Food systems should reorient to ensure adequate food supplies for all.
- > To ensure others had enough food, communities shared resources and federal food assistance became more flexible. These strategies should be formalized to ensure resiliency during any public health emergency.
- > Many more Montanans exhibited feelings of mental distress since COVID-19 began. Mental health improvement resources should be made readily available.
- > Clear, centralized, and trustworthy information should be readily available to Montanans.
- COVID-19 has resulted in both positive and negative behavior changes across the domains of food, physical activity, financial, social, mental health, internet, and media access. Supports should be put in place to encourage individuals to continue with new positive habits and change negative habits.

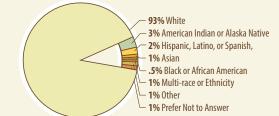

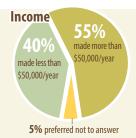

respondents living in Montana completed a survey between late April and early September 2020

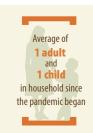

Who Completed the Survey?

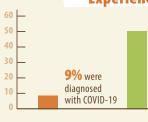

46 MEAN AGE

Experience with COVID-19

50% of respondents identified having a pre-existing condition, which could increase risk for severe COVID

56% identified that COVID-19 or its surrounding circumstances impacted the health of a family member or friend

Food Insecurity

Food security is defined as having consistent access to enough food for an active, healthy life.

Before COVID-19 11% of respondents were food insecure.

Since COVID-19 18% of respondents were food insecure.

Nutrition Resource Support

5% Free or 4% Food Banks or

Food Pantries

2%

Women, Infants, &

4%

CSA or Farmers Market

Food Gifts from A Friends or Relatives 9%

Reduced Lunch

Alternative Sources of Food (your own food production, wild food harvesting)

es Children Program (WIC) Farme When Supporting Others...

Picked up and delivered groceries or supplies

Donated food to a family member or friend

Donated to a food bank

- Individuals identifying as food insecure before and/or since COVID-19 were more likely to report a higher prevalence of underlying health conditions (such as obesity, diabetes and/or asthma), which increased risk of developing severe complications from COVID-19.
- Food insecure individuals experienced more economic hardship and were more likely to enroll in SNAP, WIC, and the school lunch program or rely on food banks pantries or food gifts from friends or family to feed their household.
- When asked about source of stress or anxiety, participants stated:
 - "Having enough food & money for bills."
 - "Working full time, teaching school to 3 children, keeping food made, housework the financial stress of having enough money for food, shelter and necessities plus trying to keep our family safe. Not to mention if I would still have a job when I arrive to work."

Food Availability

77% of respondents indicated that some of the foods they needed were unavailable when they shopped

255 dairy

163 combination foods or meals

199 the foods from the foods or meals fruits or meals

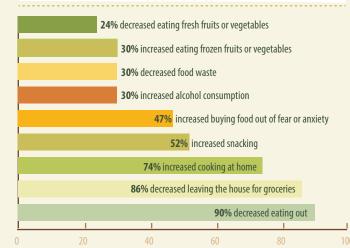

256 the foods of the foods they needed were unavailable when they shopped

255 the foods they needed were unavailable when they shopped

256 the foods they needed were unavailable when they shopped

257 the foods of the foo

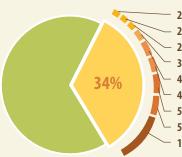

Food Habits

Financial Hardship

Financial hardship impacts food security and other health outcomes.

Of the 34% of people that experienced financial hardship due to COVID-19:

- 2% defaulted on a loan or mortgage payment
- 2% laid off employees
- 2% experienced a change in housing
- 3% had to close a business
- 4% were furloughed
- 4% left work to care for a family member
- 5% were laid off
- 5% had to temporarily close a business
- 13% had other hardships

"Due to sheltering in place, two members have been either laid off or temporarily furloughed. It has impacted finances, which in turn increases stress."

Health Behaviors

Respondents indicated that it was more challenging than usual to:

get the same amount of physical activity as before COVID-19

maintain healthy relationships with family

maintain relationships with family, friends, co-workers and in the same household community outside of the household

Respondents indicated:

A majority of respondents increased frequency of online use

Misinfomation in media was cited as a common stressor

COVID-19 and Its Impact on Montanan's Mental Health

Percentage of respondents that answered either 'all of the time' or 'most of the time' to the following mental-health related questions:

Before the COVID-19 pandemic		Since the COVID-19 pandemic began
How often did you feel nervous?	2.4%	21.5%
How often did you feel hopeless?	.9%	5.5%
How often did you feel restless or fidgety?	1.9%	17.6%
How often did you feel so sad that nothing could cheer you up?	.9%	4%
How often did you feel that everything was an effort?	1.9%	14%
How often did you feel worthless?	1.1%	4.4%

These questions are taken from the validated K6 screening scale for psychological distress.

"Being home has allowed for getting out and exercising daily."

"My time is taken up with trying to accomplish my own work, plus help my children with school work and it is difficult to carve out time for physical activity."

Examples of Positive and Negative Behavior Change due to COVID-19

which is a great strategy for

managing stress!"

depressive behaviors"

	of respondents engaged in POSITIVE health behavior change since the start of COVID-19	of respondents engaged in NEGATIVE health behavior change since the start of COVID-19
	Examples of Positive Change	Examples of Negative Change
Related	"Increased home cooked meals of unprocessed foods[I'm] eating out much less"	"Drinking more alcohol since the stay at home orders"
verage	"Not wasting food/leftovers"	"More fast foodeasier than preparing a trip to the grocery store"
