

Enrollment in the Montana Diabetes Prevention Program (DPP) by generation, 2008-2015

Data source: Diabetes Prevention Program, Montana, 2008-2015. 6,584 participants attended ≥ 1 session. Adults aged ≥ 18 years with additional risk factors are eligible for the DPP.

- Over half (52.5%) of all DPP participants fall into the Baby Boomers generation.
- 59 years is the median age of DPP participants.
- Enrollment and engagement specific to generation maybe helpful in recruitment and retention in the program.
